Service Station and Carwash in 3 Stages

I object to this application on environmental pollution grounds.

The site is a certain flood plain and has bird life that will suffer due to toxic pollution from all manner of run off, leaching initially into the surrounding soils and finding their way into water courses thus having negative consequences for ducks, herons and cormorants.

Also there will be noise pollution from such a commercial development; in the night there will be light pollution and due to the inherent nature of disposable fast food wrappers and containers there will be detritus strewn throughout the previously pleasant town.

The reason the town appears neat and tidy is that people get up at six am and pick up the garbage from the previous evening.

Please respond as per below.

Thank you,

--
