DA for Lot 2 on RP 151087, Marrakech Pty Ltd

Dear Assessment Manager

I am writing in relation to the prepared service station on the corner of Albert Street and the New England Highway

I wish to object to the submission for DA approval material change of use to Service Station on environmental grounds.

The area is flood prone.

As is in the catchment areas for the Dams contamination issues from fuel & oil must me of major concern.

Several years ago I was building a residence in the area I had to conform to using a treatment plant for our septic system, we had wished to use to old trench system and had it knocked back and that was only a toilet.

The reason being was we where in the catchment area for the Dam's. Hence how could the proposed service station ever be allowed on flood prone land.

Kind Regards,
Michael Forbes
